+ MEET THE OWNER & COMPANY HISTORY

Welcome to Roof-ER!

FOUNDER MESSAGE

My name is Oliver Brown. I founded this company in 2019, not because I have a passion for roofing or because I was born into a family of contractors, but because I saw an opportunity. An opportunity to change the reputation of roofing companies and contractors as a whole. This is an industry that is known for lack of communication, poor workmanship, used car sales techniques and straight up deceit by companies who still write up quotes with a pen and paper. With a little bit of modern thinking, integrity and hard work we've been able to build a strong brand and reputation in a relatively short amount of time. From \$2.5m in year one, as a one man sales team to \$20m in 2023, we are one of the fastest growing roofing companies in the DMV. That growth has only been possible by attracting like minded people who are looking to change their lives and those around them... And we are just getting started!

We have ambitions of growing up and down the east coast and eventually becoming a national brand. To accomplish this we need to continue to add and develop hungry, competitive team members who are dedicated to the big picture but disciplined to execute on a day to day basis.

+ TRACK RECORD OF GROWTH

\$2.5M → \$20M

From \$2.5m in year one as a one man sales team to \$20m in 2023 — fastest growing roofing company in the DMV.

+ CULTURE & TALENT

Changing Lives

Attracting like minded people who are dedicated to the big picture and disciplined to execute on a day to day basis.

+Leadership Standard: Every representative is an ambassador of the Roof-ER brand, embodying integrity, continuous development, and elite service delivery.

+ INTRODUCTION TO TRAINING AND DIRECTOR OF SALES

Welcome to your new career!

DIRECTOR OF SALES

My name is Reese Samala, Director of Sales, here at Roof-ER! I will be spending your first week here with you. I am excited to see what you accomplish here with us.

+ A QUICK INTRODUCTION OF WHO I AM:

I am a medically retired Infantryman in the Army. I have held previous positions as an automotive technician, various sales roles, and also had my own government contracting business.

+ OPPORTUNITY & GROWTH PHILOSOPHY

I am excited about the opportunities we are creating here. We are dynamically growing this business and need people like you who want to be part of that growth. I will always be a resource that you can lean on. You will hear me say this many times throughout your time here with us: My marker of success is being able to see other people achieve things that they have not been able to achieve previously.

+ FIRST-WEEK COMMITMENT

Thank you and I am excited to see what you accomplish here!

Reese Samala
DIRECTOR OF SALES · ROOF-ER

SALES EXCELLENCE & FIELD MENTORSHIP

+ MEET THE GENERAL MANAGER

How the company actually runs

GENERAL MANAGER

My name is Ford Barsi. I am the General Manager at Roof-ER. Oliver built this company. Reese runs sales. I run the machine those two things sit on: how we hire, how we onboard, how a file moves after the sale, and how a new market stays on the same standard as Vienna.

+ A QUICK INTRODUCTION OF WHO I AM:

I did not grow up in construction. I came out of restaurants: kitchens, service, running a floor. That job is the same job, just with heat and tickets instead of storms and claims. You either hit the standard or the table feels it. I started here in 2020 on the storm-restoration side: roofs, siding, gutters. I learned this business on the ladder and at the door before I ran any of it.

+ ACCOUNTABILITY & PROBLEM-SOLVING

If Reese is with you in week one, I am who you will keep running into after that. Ops interviews come through me. Company onboarding on the tech and CRM side comes through me. If something is broken in how we operate, that is my problem, not a mystery you are supposed to live with.

+ THE REPEATABILITY STANDARD

We are not asking you to be impressive. We are asking you to be repeatable: same inspection, same pitch, same file, same standard, whether you are in the DMV, Richmond, or PA. Do that, and this place will take you seriously.

Ford Barsi

GENERAL MANAGER • ROOF-ER

SYSTEMS, OPERATIONS & STANDARDS

+ GUIDING PRINCIPLES

Mission and Values

STANDARD OF EXCELLENCE

+ OUR MISSION:

At Roof-ER, our mission is to hold a fiduciary responsibility to our customers - plain and simple. In an industry known for poor workmanship, lack of communication, and at times, outright deceit; we seek to restore the name of exterior remodeling contractors nationwide. By committing to our core values of Integrity, Quality, and Simplicity, we promise to deliver an experience every homeowner wants when remodeling their home: a simple and straightforward quality installation for a fair and honest price.

+ OUR CORE VALUES:

PILLAR 01

Integrity

Integrity: At Roof-ER, we set the standard for Integrity in an industry that has lost credibility among many consumers. We do not only set the standard of integrity with our clients, but it starts with being honest to ourselves. We have the courage to truly see ourselves, recognize where we can grow, and implement changes to meet the demands of reality.

PILLAR 02

Quality

Quality: We guarantee the highest Quality in our products and services. Our confidence in our craft propels us into the elite 1% of all roofing companies in the entire nation. Quality starts with the moment a client interacts with one of our representatives at the door. The Quality demonstrated in every aspect of what we do continues to make Roof-ER the gold standard of this industry.

PILLAR 03

Simplicity

Simplicity: We strive to deliver an overwhelmingly positive experience for everyone who interacts with Roof-ER. By embracing the complexities of our industry, we provide exceptional results to our clients. Our clients value the Simplicity of partnering with us - we guarantee a seamless process from start to finish ensuring satisfaction with the final outcome.

+Core Commitment: Integrity, Quality, and Simplicity form the non-negotiable benchmark for every field inspection, customer phone call, and installed roof.

+ CODE OF PROFESSIONAL CONDUCT

Your Commitment

11 COMMITMENTS

- | | |
|---|---|
| <p>1 1. I will conduct myself in alignment with the Mission and Core Values.</p> | <p>2 2. I will dedicate myself to Roof-ER's successful sales process.</p> |
| <p>3 3. I will always show an exceptional level of integrity when interacting with clients, co-workers, and (especially) myself.</p> | <p>4 4. I will listen to and grow from receiving constructive feedback.</p> |
| <p>5 5. I will not be afraid to communicate with the correct individual(s) when I have an issue or grievance.</p> | <p>6 6. I will not be involved in gossip or "office drama."</p> |
| <p>7 7. I will be an effective and contributing member of the Roof-ER team.</p> | <p>8 8. I will show an intense level of discipline in the work that I conduct.</p> |
| <p>9 9. I will not let negativity or "bad days" have a detrimental impact on my work ethic and the quality of what I do.</p> | <p>10 10. I will have pride in my work.</p> |

+ 11. THE DEDICATION STANDARD

11. I will do what it takes to commit to this. I will achieve tremendous levels of success. I have seen the success that others achieved by committing to this process - I WILL be part of that.

+ TEAM MEMBER SIGNATURE & COMMITMENT:

MANDATORY STANDARD FOR ALL ROOF-ER FIELD REPRESENTATIVES

+ CANVASSING & OPENING PROTOCOL

Initial Pitch

DOOR SCRIPT

+ 5 NON-NEGOTIABLES WITH EVERY PITCH

1

1. Who you are

2

2. Who we are and what we do (Roof-ER)

3

3. Make it relatable

4

4. What you're there to do (an inspection)

5

5. Go for the close (them agreeing to the inspection)

Knock on door / ring doorbell. As they are opening the door, smile and wave.

"Hi, how are you? My Name is _____ with Roof-ER we're a local roofing company that specializes in helping homeowners get their roof and/or siding replaced, paid for by their insurance!"

+ GENERIC:

"We've had a lot of storms here in Northern Virginia/Maryland over the past few months that have done a lot of damage!"

"We're working with a lot of your neighbors in the area. We've been able to help them get fully approved through their insurance company to have their roof (and/or siding) replaced."

+ SPECIFIC:

"Were you home for the storm we had in ___." Wait for answer. If yes: "It was pretty crazy right?!" Wait for answer. If no: "Oh no worries at all, we get that all the time." If yes, move on to next line.

"We're working with a lot of your neighbors in the area. We've been able to help them get fully approved through their insurance company to have their roof (and/or siding) replaced."

"While I'm here, in the neighborhood, I am conducting a completely free inspection to see if you have similar, qualifiable damage. If you do, I'll take a bunch of photos and walk you through the rest of the process. If you don't, I wouldn't want to waste your time, I wouldn't want to waste mine! I will at least leave giving you peace of mind that you're in good shape."

ONCE THEY AGREE TO LET YOU DO THE INSPECTION:

"Alright! It will take me about 10 - 15 minutes. I'm gonna take a look around the perimeter of your home, then grab the ladder, and take a look at your roof."

Go in for a handshake.

"What was your name again? [Their name] great to meet you, again I am (your name). Oh and by the way do you know who your insurance company is?"

Wait for their answer.

"Great! We work with those guys all the time."

"I will give you a knock when I finish up and show you what I've found."

Without any hesitation, move into inspection. (See Inspection and Post-Inspection Script for detailed next steps.)

+ FIELD INSPECTION PROTOCOL

Inspection

PHOTO PROGRESSION

+ IDEAL PHOTO PROGRESSION

- Mailbox / House Number / Overview of House

- Front Elevation Collateral — damage to screens, gutters, downspouts, siding

- Right Elevation Collateral — damage to screens, gutters, downspouts, siding

- Rear Elevation Collateral — damage to screens, gutters, downspouts, siding

- Left Elevation Collateral — damage to screens, gutters, downspouts, siding

- Roof Overview Collateral

- Damage to roof metals and other collateral on the roof

- Circle Hail Hits & Slash Wind Damage (close up of each)

- Overview of majority of the damage chalked up

- Pictures of granules in the gutters or at the bottom of downspouts

- Flashlight

+ INSPECTION TIMELINE & PHOTO DISCIPLINE

Entire inspection shouldn't take any longer than 15-20 minutes. How thorough of an inspection you should do is a judgment call. Getting enough photos to sell the homeowner is most important. It doesn't matter how quickly you are able to complete the inspection if you don't have enough damage-photos for the homeowner to be on board with filing the claim.

+ POST-INSPECTION PRESENTATION (PART 1)

Post-Inspection Pitch

PHOTO REVIEW SCRIPT

Knock on the door.

"Hey _____, so I have a bunch of photos to show you. First I walked around the perimeter of the house to look for collateral damage. I'll also show you the collateral damage we found on the roof."

Start showing the pictures of damage to screens, gutters, downspouts, and soft metals.

+ THE LAWYER & EVIDENCE CASE ANALOGY:

"While this damage functionally isn't a big deal, it really helps build a story. Think of us like lawyers and this collateral damage is the evidence that builds the case which helps us get the roof and/or siding approved."

Continue to slide through collateral damage photos.

"Here are the photos of the damage to your shingles. Anything I have circled means its hail damage (IF there were any wind damaged shingles or missing shingles say:) and anything I have slashed means its wind damage."

Remain on a photo of hail damage as you explain the following.

+ SCIENCE OF HAIL DAMAGE & FREEZE-THAW CYCLE:

"This is exactly what we look for when we're looking for hail damage. If you notice, the divot is circular in nature. Even if this damage doesn't look like a big deal, what happens over time, these hail divots fill with water, freeze..., when water freezes it expands and breaks apart the shingle which will eventually lead to leaks. That is why your insurance company is responsible and your policy covers this type of damage."

Start slowly swiping through all the pictures of hail.

"As you can see there is quite a bit of damage."

Start slowly swiping through all the pictures of hail. If there was wind damage or missing shingles, say the following:

"Now here are the wind damaged shingles. You have both shingles that are creased from the wind lifting them up and shingles that have completely been blown off."

+ POST-INSPECTION (PART 2) & IN-HOME TRANSITION

Post-Inspection Pitch (Cont.)

IN-HOME CONVERSION

Show the pictures of wind damaged and/or missing shingles (if applicable).

"This is very similar to damage to _____ home and/or the rest of the approvals we've gotten in the area."

+ STORM EXPERTS VS. INSURANCE LOSS MITIGATION:

"With that being said, insurance companies are always looking for ways to mitigate their losses. It's unfortunate but that's how they make money. The most important part of this process is that when your insurance company comes out to run their inspection, we are here as storm experts to make sure you as a homeowner get a fair shake. If they are missing anything we make sure they see all the damage that I just showed you."

"What I'm going to do now is run to my car, grab my iPad and we can get this process started!"

Go get iPad. As you approach back to the house/homeowner ask: *"Is there a place we could sit down for 5-10 Minutes"?*

Once you are in the house, spend some time building rapport as you get settled.

"Okay, so first I am going to grab some of your basic information for our system. Then we can give your insurance company a call."

+ GATHER INFORMATION FROM THE HOMEOWNER:

Full name	Address	Phone Number
E-mail	Insurance Company	

"Do you happen to know your deductible? If not, no big deal at all!"

+ AFTER YOU HAVE COLLECTED ALL THE INFORMATION:

Ask if they have the app or if they have the login to the website.
If not, use the Homeowner Information Sheet to prep the HO. As you are writing or typing the information for the HO to use on the call, explain each part to them.
As much as possible, use HO's phone to make the call.
Reference Claim Filing Information Sheet.
Move on to Contingency & Claim Authorization.

+ INSURANCE CLAIM INITIATION

Claim Filing Information Sheet

CALL PREP GUIDE

You should use this information to prep the HO. Use a blank note on your iPad.

+ HO: "I'd like to file a claim for hail [and wind] damage" (never only wind)

INSURANCE: "WHAT WAS DAMAGED?"

Roof

Downspouts

Gutters

Window Wraps

Siding

Etc.

- Date of loss
- Size of hail (usually 1 – 1.5 inches)
- Any interior damage?
- Was there any personal property damaged?
- Have you selected a contractor? (yes, we want them to know ASAP that you are working with me)
- Is your roof steeper than an average staircase?
- Time of storm (usually around 5pm)
- Type of shingle and/or siding
- Is the house livable?
- Did they lose power?
- Do they have an estimate? (always no)
- How high is the roof / is it difficult to access with most ladders?

+ THINGS THEY SHOULD DO ON THE CALL:

1. Ask for adjuster info, if not available yet, that's okay too.
2. Always ask for claim number.
3. If Claim Rep wants to schedule the inspection now (only Allstate) – have 3 available times listed out for the HO.

See example on next page.

+ FIELD REFERENCE TEMPLATE

Example Claim Filing Information Sheet

SAMPLE RECORD

Let them know you would like to file a claim for hail and wind damage.

WHAT WAS DAMAGED

What was damaged: Roof and Aluminum siding

DATE OF THE STORM

Date of the storm: September 8th 2023

TIME OF THE STORM

Time of the storm: Around 5pm

SIZE OF HAIL

Size of hail: 1 inch

TYPE OF SHINGLE

Type of shingle: Asphalt

TYPE OF SIDING

Type of siding: Aluminum

INTERIOR DAMAGE

Interior Damage: Yes, 1 bedroom upstairs

IS THE HOUSE LIVABLE

Is the house livable: Yes

WAS THERE ANY PERSONAL PROPERTY DAMAGED

Was there any personal property damaged: No

DID THEY LOSE POWER

Did they lose power: No

HAVE YOU SELECTED A CONTRACTOR

Have you selected a contractor: Yes, Roof ER out of Vienna VA. All my information is on the business card

DID THEY GIVE YOU AN ESTIMATE

Did they give you an estimate: No

IS YOUR ROOF STEEPER THAN A STAIRCASE

Is your roof steeper than a staircase: No

HOW HIGH IS YOUR ROOF / IS IT DIFFICULT TO ACCESS WITH MOST LADDERS

How high is your roof / is it difficult to access with most ladders: No, it has 1 story access

+ POST-FILING MANDATORY CALL PROTOCOL:

After they say the claim is filed, please ask for the Claim Number.
After they provide that, ask if an adjuster has been assigned.

+ CONTINGENCY & CLAIM AUTHORIZATION PITCH

Contingency & Claim Authorization

CLOSING AGREEMENTS

After the call:

"Okay, perfect! (Like they said,) an adjuster will be reaching out to you in the next 24 to 48 hours to schedule the inspection. The absolute most important part of this process is that I am at this inspection. Insurance companies don't want to pay out. They are trying to mitigate their losses after storms. I am there as your representation to make sure you get a fair shake."

Turn the iPad so you and the homeowner can see.

+ CONTINGENCY AGREEMENT WALKTHROUGH:

"This basic/simple agreement backs you as the homeowner by guaranteeing you that your only cost will be your deductible if we get you fully approved. If it is a partial approval or denial, first we will fight and jump through the necessary hoops to turn that into a full approval; but if we are not able to get you fully approved, this contract is null and void and you do not owe us a penny."

"What's in it for us, is we just want to get to do the work. This agreement commits you to using us if we hold up our end of the bargain and achieve a full-approval."

You sign. They sign.

+ CLAIM AUTHORIZATION FORM:

"This next form is our Claim Authorization form. Very simple, it allows us to communicate with your insurance company. I'll be here for the inspection and we will also communicate with them through email and phone calls so you don't have to be a middle-man. Of course, I'll always keep you looped in with our communication by CCing you in all emails and updating you on any conversations we have."

They sign. Press Submit. Enter password "roofer" if it asks.

"Alright, we are all set! Again, the most important part of this process is that I am here when the insurance company comes out. Please let me know when that's scheduled. Ideally you can have them call me to schedule that directly. If they would rather schedule with you, please avoid Tuesday mornings until about 1 pm as I am not available then. But, please let me know as soon as it is scheduled and I will make sure it is in my calendar."

Answer any questions that the HO may have.

"Thank you, sir/ma'am, looking forward to seeing you on the day of inspection, you have my contact information on my card if you need anything else."

+ MATERIAL IDENTIFICATION

Shingle Types

3-TAB

+ INSTALLED ROOF OVERVIEW

FIELD APPEARANCE

Field Context: High-angle perspective showing uniform, flat asphalt courses across the roof plane with visible box vents, pipe collar, and ridge line.

+ SINGLE SHINGLE STRIP ANATOMY

STRIP PROFILE

Material Anatomy: Straight-on view of a full strip showing the three distinct tabs, the two cutouts that separate them, uniform exposure width, and the factory sealant line.

+ REPEATING PATTERN DETAIL

TEXTURE & ALIGNMENT

Pattern Characteristics: Close-up of staggered courses highlighting the classic brick-like offset, flat relief, and consistent vertical slot alignment.

+ MATERIAL IDENTIFICATION

Shingle Types

ARCHITECTURAL

+ SIDE-BY-SIDE COMPARISON

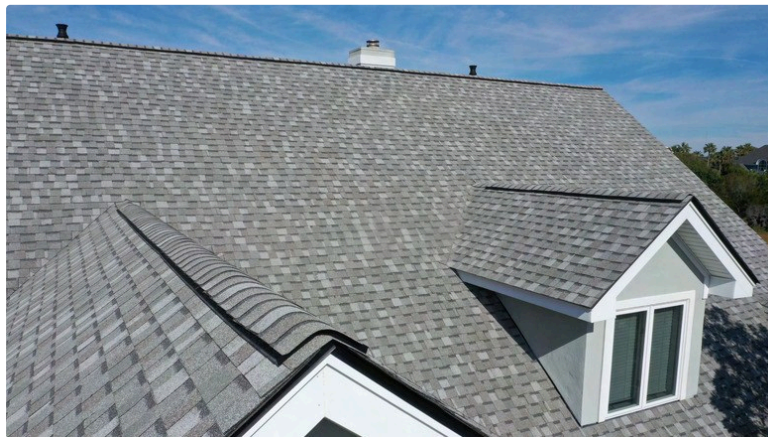

3-TAB vs ARCHITECTURAL

Direct Comparison: The two profiles against each other — 3-Tab on the left with flat, uniform courses; Architectural on the right with layered, dimensional tabs.

+ INSTALLED ROOF OVERVIEW

DIMENSIONAL APPEARANCE

Field Context: Dimensional laminate roof in place, showing multi-tone shadow bands and depth carried across slopes, valleys, and dormers.

+ LAMINATED STRIP ANATOMY

STRIP PROFILE

Material Anatomy: A full laminated strip laid flat — staggered lower tabs bonded to a backing sheet, with the reinforced nailing zone running across the top.

+ INSURANCE-QUALIFIABLE STORM EVIDENCE

Damage Photos

STORM DAMAGE

1. Hail strike circled in chalk — impact bruise on the shingle surface

2. Hail strike circled in chalk — granule loss at the point of impact

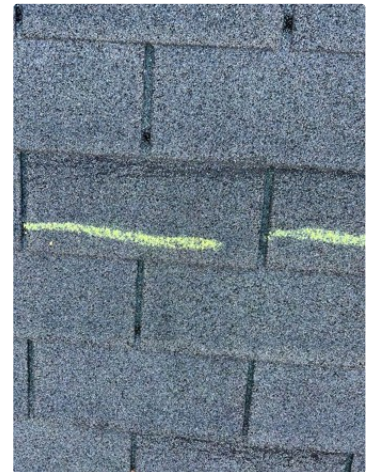

3. Hail strike circled in chalk — mat bruising visible inside the circle

4. Soft-metal collateral — chalk-marked hits on pipe collar flashing

5. Elevation collateral — window wrap, siding, and gutter run

6. Wind damage — chalk slash marking a creased tab

7. Slope overview — damage documented in context across the full slope

+ NON-QUALIFIABLE WEAR & DEFECTS

Damage Photos

NOT STORM DAMAGE

1. Lifted and curled tabs — age and heat, not a single storm event

2. Blistering — small dark pockmarks where granules have lifted

3. Blister circled in chalk — round like hail, but with no impact bruise

4. Blistering close-up — granule loss from the blister itself

5. Surface scuff — abrasion across the granule surface

6. Horizontal tear — mechanical damage, not storm impact

7. Craze cracking — age-related surface cracking across the mat
